3-JAW PNEUMATIC POWER CHUCK type 2575-400-SP

This self - centering, scroll pneumatic power chuck is purposed for all turning machining jobs. Operational characteristics of this power chuck are similar as for other manual and power lathe chucks. Large through hole. Designed for use in pairs on two-side spindles of machine-tools for machining pipes or long objects. No need to use additional power cylinders or drawbars for clamping.

Ordering code 0642 525 750 506

Clamping range	mm	10 ÷ 400
Permissible speed	min ⁻¹	1500
Clamping force	daN	9000
Accuracy	mm	0,06
Working pressure	MPa	0,63
Air supply pipe diameter		R 1/2"
Flow rate	m ³ /min	0,1
